

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Currently amended) A method comprising:  
defining a set of attributes associated with at least one resource;  
associating a set of constraints with the attributes, the constraints corresponding to a context and being defined by a resource template;  
determining that a resource matches the set of attributes and constraints; and  
displaying the resource as a selectable resource graphical object on a user device.
2. (Original) The method of claim 1, wherein defining the set of attributers comprises:  
receiving information that defines an object class of the at least one resource.
3. (Original) The method of claim 2, further comprising:  
receiving information that defines an attribute associated with the object class.
4. (Original) The method of claim 2, wherein receiving information comprises:  
receiving information from a user device with a graphical display having an active area for the input of the information.

5. (Original) The method of claim 1, further comprises:  
  
displaying a selectable template graphical object on a graphical display device  
  
prior to the determining that a resource matches, the template graphical object  
  
representing an active area associated with the defined resource.
6. (Original) The method of claim 1, wherein defining the set of attributes  
  
comprises:  
  
determining the set of attributes based on a profile of a user's interactions with at  
  
least one of a user device and an application.
7. (Original) The method of claim 1, further comprises:  
  
receiving a selection of the resources template; and  
  
executing an application associated with the found resource.
8. (Original) The method of claim 7, wherein executing an application comprises  
  
executing the application within a guided procedure workflow.
9. (Original) The method of claim 1, wherein the resource comprise at least one  
  
of an executable application, a datum and a web-page.
10. (Currently amended) An article comprising a machine-readable medium including  
  
machine-executable instructions operative to a-cause a machine to:

define a set of attributes associated with at least one resource;

associate a set of constraints with the attributes, the constraints corresponding to a context and being defined by a resource template;

determine that a resource matches the set of attributes and constraints; and

display the resource as a selectable resource graphical object on a user device.

11. (Currently amended) The article of claim 10, wherein instructions operative to ~~a-cause~~ a machine to define the set of attributes comprises instructions operative to a cause a machine to:

receive information that defines an object class of the at least one resource.

12. (Currently amended) The article of claim 11, further comprising instructions operative to ~~a-cause~~ a machine to:

receive information that defines an attribute associated with the object class.

13. (Currently amended) The article of claim 11, wherein instructions operative to ~~a-cause~~ a machine to receive information comprises instructions operative to ~~a-cause~~ a machine to:

receive information from a user device with a graphical display having an active area for the input of the information.

14. (Currently amended) The article of claim 10, further comprises instructions operative to ~~a-cause~~ a machine to:

display a selectable template graphical object on a graphical display divide prior to determining that a resource matches, the template graphical object representing an active area associated with the defined resource.

15. (Currently amended) The article of claim 10, wherein instructions operative to ~~a-cause~~ a machine to define the set of attributes comprises instructions operative to ~~a~~ cause a machine to:

determine the set of attributes based on a profile of a user's interactions with at least one of a user device and an application.

16. (Currently amended) The article of claim 10, further comprises instructions operative to ~~a-cause~~ a machine to:

receive a selection of the resource template; and  
execute an application associated with the found resource.

17. (Currently amended) The article of claim 16, wherein instructions operative to ~~a-cause~~ a machine to execute an application comprises instructions operative to ~~a~~ cause a machine to execute the application within a guided workflow.

18. (Original) The article of claim 10, wherein the resource comprises at least one of an executable application, a datum and a web-page.
